

Dear Valued Customer,

Consider for a moment how much time you spend creating, scoring, and recording your students' work. Wouldn't it be great if you could quickly and easily design all of your students' assignments, quizzes, and tests—and have them scored and entered into your gradebook automatically?

Now you can! With **AccelTest™**, you'll no longer spend hours each week creating quizzes and tests for your students. And you'll no longer spend your nights and weekends scoring assignments and hand-entering grades. With this powerful new tool, you can create and score new assignments *in just minutes*—for any academic subject—and have the results instantly available. You can also take an existing assignment and create a score key to fully automate the assignment—saving you even more time!

### **You Get Three Powerful Teaching Tools in One**

AccelTest consists of three complementary tools: an easy-to-use software program, an electronic gradebook, and the AccelScan® optical mark reader. The software and gradebook help you design and manage an unlimited number of customized quizzes, tests, and exercises to match your needs and curriculum. The AccelScan optical mark reader automatically scores students' work with the utmost accuracy. And here's more good news: **AccelTest will work with your existing AccelScan optical mark reader!**

Using AccelTest is simple. The software features on-screen tutorials and easy-to-follow prompts that walk you through the process of assignment creation step-by-step. After a student completes an assignment, AccelTest automatically scores it, and then enters the score into a student performance database. At last, no more entering grades by hand! AccelTest also provides you with a number of valuable reports to help you monitor the progress of each of your students and class overall.

### **Now You Can Create More Kinds of Questions and Assignments Than Ever Before**

AccelTest gives you the power to generate a wide variety of question types including multiple choice, true/false, short answer, essay, and more. Both questions and answers can be shuffled automatically to ensure that all your students do their own work.

With AccelTest, you can create make-up tests that are different but equal in difficulty to the originals. What's more, you can design new tests using only the questions students answered incorrectly, so students can retake tests for partial credit.

You'll be amazed at AccelTest's tremendous versatility. You can create new assignments or use

*(over, please...)*

an existing assignment and make modifications to it. In addition, AccelTest lets you add charts, diagrams, and graphics to specific questions, or add instructions and explanations to your quizzes and tests. It's entirely up to you!

### **Built-In Gradebook Streamlines Your Record Keeping**

AccelTest features a built-in gradebook that automatically records students' scores on quizzes, tests, and assignments. The gradebook also enables you to easily calculate quiz and test scores, report scores by student or subject, and monitor incomplete work and late assignments. Now, with the click of a button, you can instantly see the performance status of an individual student or your entire class.

### **Manage Classwork More Easily and Save Time—Order AccelTest Now!**

With AccelTest, you can create and score new assignments—in any academic subject—in just minutes, and have the results available instantly. Plus, you can easily manage all of your existing assignments. *The end result?* No longer will you have to spend hours creating tests and quizzes. Now you'll have more time to do what you enjoy most: *teach!*

To take advantage of this powerful, versatile classroom tool, simply complete the enclosed card and return it with your purchase order. Or for even faster service, call us toll free at **(800) 338-4204, ref. #6344.**

Sincerely,

Jacqueline Wolf  
Director, Customer Support

P.S. The AccelScan Intelligent Mark Recognition Reader can also be used with Accelerated Math<sup>®</sup>, Accelerated Writer<sup>™</sup>, Surpass<sup>™</sup>, and StandardsMaster<sup>™</sup> software. For more information, see the enclosed flyer or call toll free **(800) 338-4204, ref. #6344** (outside the U.S.: 1-715-424-3636).
